

COVID-19 Visiting a home safely

In the current circumstances, it is important to comply with certain hygiene measures issued by public health:

Checking whether the owner has **travelled recently** or has any **cold, flu or other symptoms**. If so, rescheduling the appointment.

Limiting the number of people present as much as possible, by visiting the home **one person at a time** if possible.

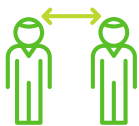

Avoiding **children or seniors** (aged 70+) being present.

Letting the owner open **doors and cupboards** and handle **light switches**, to limit points of contact.

Washing hands before and after the visit.

Maintaining a **2 metre (6 ft.) distance** at all times.
